ABBREVIATIONS

blo – back loop only
ch – chain
est st pat – established stitch pattern
rnd – round
sc – single crochet
ssc – split single crochet
sl st – slip stitch
st(s) – stitch(es)

GAUGE

20 sts x 25 rows = 4x4 inches in established stitch
pattern, see notes.
The stitches per inch is 5

NOTES

Since this is worked continuously, it is helpful to
place a stitch marker on the first stitch of each row.

These crochet socks use a fun stitch combination
and are worked from toe-up. The heel is an ‘after-
thought heel’ where we create an opening for the
heel area and come back to work the heel last. The
yarn will be carried on the back of the work, see
video.

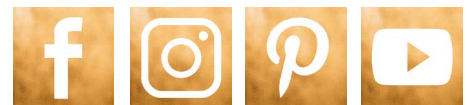

MEASUREMENTS:

This sock is meant to be crocheted for a custom fit to
your foot. This sock can be tried on and adjusted as
you go, the colorwork portion is either a 6 or 8 stitch
repeat.

Instructions are for adult women’s sizes. For a help-
ful chart of sock sizes visit: <https://brianakdesigns.com/how-to-size-crochet-socks>

More About This Pattern

The [Vine Sock Video Tutorial](#) and the written pattern will follow an example sock for stitch counts. This example sock will fit a foot circumference of 8 inches, however adjust these as needed.

Special Stitches:

The established stitch pattern (est. st pat) is worked across an even number of stitches as follows: *sc 1 in the blo, ssc next*; repeat for number of stitches needed.

Split Single Crochet (ssc): also known as the waistcoat stitch.

This stitch is worked as single crochet but where the hook is inserted is the only difference. The hook will be inserted between the 'V' of the stitch.

Insert hook between the legs of the stitch (on the back of work the hook should be under the horizontal bar and between the upside-down 'V' shape as well), yarn over, pull up a loop to the height of a single crochet, yarn over, pull through both loops on hook. Keep your hands loose and comfortable. If your hands are starting to hurt, then the tension of the stitch is too tight. When entering the stitch, pull up the loop a bit more than you normally would, it will give the 'V' more space for the next round and make working the ssc comfortable.

Custom Fit:

This sock is meant to be crocheted for a custom fit to your foot. This sock can be tried on and adjusted as you go. If trying on the sock is not possible, or you are making these socks for a friend, measure the foot to determine how many stitches/rows will be needed in each section for the best fit. Each measurement below should be taken while standing, except for C.

A: Circumference for Leg:

Measure the topmost part of your leg, the thickest part, and where you would like the height of the sock.

B: Height of Leg:

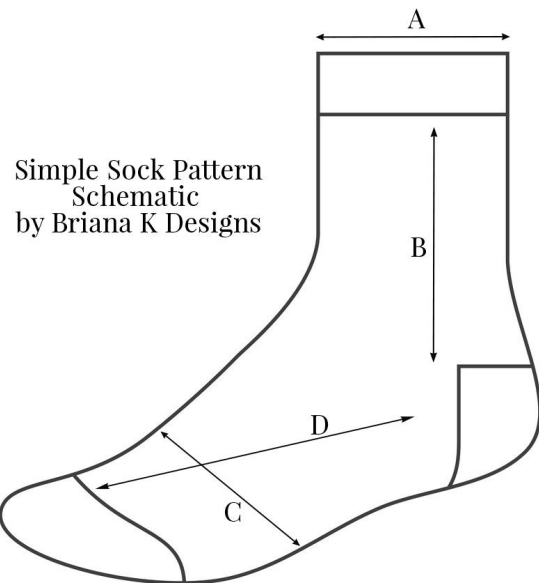

From where you took measurement A to the top of the heel.

C: Circumference of Foot:

Measure where your foot is thickest. The actual measurement of the finished sock will be about 1/2 to 1 inch less than this measurement.

D: Instep:

Measure from the bottom of your toes to about 1 inch before the heel.

Formula To Calculate the Circumference Stitches (C)

Foot Circumference Measurement - 10% = Sock Circumference

Next, take the Sock Circumference and multiply it by the gauge stitches per inch.

Example:

Actual Foot Circumference Measurement of 9 inches - 10% = 8.1 (the Sock Circumference). Or find these measurements on the free chart download.

Now that we have the Sock Circumference we will multiply it by the gauge (sts per inch), for this example, let's say the gauge is 5 sts per inch.

$$8.1 \times 5 = 40.5$$

So for this foot calculation, the stitches needed for C are 40 sts.

TOE OF SOCK AND INSTEP

Round	Description	St Count
1	Using 3.5 mm hook and Color A , working inside the Magic Ring sc 8, pull ring closed, do not join as this will be worked continuously. Place stitch marker in first stitch and move up each round.	8
2	2 ssc in each st around.	16
3	ssc in each st around.	16
4	2 ssc in first st, ssc in next, *2 ssc in next, ssc in next*; repeat from * to * around.	24
5	ssc in each st around. <i>If making a baby/child size skip to round 10.</i>	24
6	2 ssc in first st, ssc in next 2 sts, *2 ssc in next, ssc in next 2 sts*; repeat from * to * around.	32
7	ssc in each st around. <i>For smaller foot circumferences increasing may stop here, or increase less on the next round.</i>	32
8	2 ssc in first st, ssc in next 3 sts, *2 ssc in next, ssc in next 3 sts*; repeat from * to * around.	40
9	ssc in each st around.	40
10	ssc in first, blo sc in next, *ssc in next, blo sc in next*; repeat from * to * around. This round creates the established stitch pattern.	40
Repeats	Repeat Round 10 until the sock reaches about 1 1/2" from the heel, it's best to try it on and add or remove rows if needed. This creates the Instep, measurement D. Please Note: <i>This is a great time to customize the sock to your foot size, this example is for a foot circumference of 8 inches. Remember these will stretch a little as worn so it should be a little snug, but if it starts to feel too tight add increases by placing 3 ssc into one stitch on each side. Don't be afraid to change the stitch count for your foot.</i>	40

GUSSET

Round	Description	St Count
1	<i>Please note: this gusset is following the stitch counts from the example sock in the video, it's okay if your gusset stitch count is different.</i> *3 ssc in first, work 19 sts in est st pat (or half the stitches in the round)*; repeat from * to * around.	44
2-3	Work est st pat in each st around.	44
4	*3 ssc in first, work 21 sts in est st pat (or half the stitches in the round) *; repeat from * to * around.	48
5-6	Work in the est st pat around. It's perfectly fine if your stitch count is more or less, it simply needs to be an even number of stitches.	48

SPLIT FOR HEEL

Round	Description	St Count
1	This round will make space for the heel to work later. Ch 24 (or half the stitch count), skip 24 (or half the stitch count), work the remaining sts in est st pattern.	48

TOP OF SOCK & COLORWORK

Round	Description	St Count
1-5	<i>Please Note: For the first round across the chain sts, sc sts will be worked. If you have increased or decreased the number of stitches in the instep, the total stitch count must either be in repeats of 6 or 8 stitches for the colorwork. Adjust the stitch count in this section if needed.</i> Continue to work in the established stitch pattern.	48

TIPS FOR COLORWORK:

When crocheting the colorwork, the yarn will be carried along the back in the fair isle style. Try to not carry a color for more than 3 stitches so your floats aren't too long. You can catch/trap the yarn behind a stitch to keep the floats consistent. To read more about colorwork please visit: <https://brianakdesigns.com/ways-to-colorwork-in-crochet/>

How to read the colorwork instructions:

In the colorwork section Color A will be abbreviated as (A), and Color B as (B).

Example: (B) x 5 = with Color B ssc the next 5 stitches

The chart will be worked from right to left for each round and repeated until the end of the round.

8 STITCH REPEAT FOR COLORWORK

The rest of the stitches for the colorwork portion will be worked as SSC, not in the established stitch pattern. The following instructions will be for an 8-stitch repeat.

Hello, my fellow crafters!

I feel we are all natural-born artists nourishing our talents throughout our entire lives.

I've been fortunate enough to have found a home in the fiber arts community where my passions for crochet, knit, and cross stitch can grow.

I'm a Florida girl for over a decade, but I lived in the Rocky Mountains for my childhood. A place where I understood the value of warm hats and mittens. While I love nature and hiking, I've grown extremely fond of the sunny beaches.
